About Us

Phillip Nova

Phillip Nova (formerly known as Phillip Futures) was inaugurated in 1983 as a member of PhillipCapital Group and is one of the founding clearing members of Singapore Exchange Derivatives Trading (SGX-DT). We have since grown to become one of the region's top brokerages for the trading of Stocks, CFD, Forex, global Futures and Commodities.

The Group has clearing memberships in 21 global exchanges, including APEX, BMD, CME Group exchanges, Borsa Istanbul, DGCX, HKEX, ICDX, ICE Singapore, JPX Group exchanges, TFEEX, TOCOM and SGX. In addition, Phillip Nova offers trading access into China's Dalian Commodity Exchange, Shanghai International Energy Exchange and Zhengzhou Commodity Exchange, as well as Hanoi Stock Exchange and Taiwan Futures Exchange.

Phillip Nova holds a Capital Markets Services License issued by the Monetary Authority of Singapore, for dealing in stocks, futures/derivatives contracts and leveraged foreign exchange. As such, we comply with stringent reporting requirements and fund segregation regulations under MAS directives that are designed to protect you.

Products

At Phillip Nova we offer a wide variety of global products that can help expand your trading opportunities beyond the local market. Our 24-hour Dealing Desk provides access to timely market information and immediate execution.

- Server co-location for fastest speed and performance

Trading Technologies

- Professional execution platform for advanced trading techniques and easy automation programming with ADL (Algo Design Lab)
- FIX connectivity solution for institutions and FCMs to route global orders. Cloud hosted solution for efficient deployment in networking

Phillip MetaTrader 5

- Over 400 pairs of Forex, Index, Crypto and Share CFD trading
- One of the most popular platforms that supports Expert Advisors and discretionary trading
- Connectivity to MetaTrader Gateway

Phillip Nova

- Simple and user-friendly
- Multi-asset trading platform with a short learning curve
- API solution for developers and programmers into algorithmic and global order routing

Business Solutions

Direct Market Access (DMA)

Clients who require low latency, speed and stability may take advantage of our extensive clearing memberships to gain direct market access into global exchanges and liquidity pools.

API Solutions

Phillip Nova offers qualified professional clients customisable API solutions to increase efficiency and expand global connectivity. With our wide selection of platforms, you can connect to a variety of global asset classes on your existing trading system. Available API types include FIX protocol, Web API and REST API.

Esunny

Exclusive to FCMs and Corporates who are existing users of Esunny, this is a connectivity solution known for cost efficiency while maintaining speed and stability. We support the order routing middle office solution to route orders into six major exchanges worldwide - SGX, Bursa Malaysia, CME Group, APEX, HKEX and JPX Group.

FX and CFD Liquidity

Phillip Nova offers direct connectivity to a deep pool of FX and CFD liquidity sources through bridge providers and technology distribution hubs including OneZero, Currenex and Integral services. Their presence in major financial data centers of TY3 and NY4 help clients to achieve low latency and faster execution speed. Institutional and corporate clients may connect their MetaTrader 5 platforms, proprietary or third-party systems (via FIX) to access our wholesale FX/CFD pricing.

Co-location Services

Phillip Nova offers market makers, liquidity providers, high frequency traders and arbitrageurs the ability to take advantage of price disparity with different exchanges and asset classes. We offer unique access to emerging markets in Asia and the advantage of co-location and latency sensitive connectivity. You can place your servers in exchanges and remotely manage strategies from anywhere in the world. In addition to using our low latency trading offered on exchanges like SGX, BMD and CME, co-location facility can be arranged with exchanges like JPX and DGCX. Create your trading edge through our co-location services.

Our Services

24-hour broking, technical and execution support for a full range of stocks, futures and OTC products including Forex and CFD

Gateway to more than 21 global exchanges including direct hub access to SGX and CME Group exchanges for faster connectivity

Wide array of e-trading solutions and execution platforms to meet your specific needs

Professional expertise on transaction, clearing, settlement and delivery of the various asset classes

A suite of straight-through processing solutions and account management services for efficient post trades and settlement services
